

# The Transportation Energy Data Book (TEDB)

The *Transportation Energy Data Book (TEDB)* is a compendium of data on transportation with an emphasis on energy. Designed for use as a desk-top reference, the TEDB was first published in 1976 and has continued to the 33<sup>rd</sup> Edition. It includes historical data tables that provide the foundation for the analysis performed by Vehicle Technologies Office staff and other transportation analysts in pursuit of energy efficient and environmentally-friendly technologies. The TEDB is produced by Oak Ridge National Laboratory for the U.S. Department of Energy's Office of Energy Efficiency and Renewable Energy, Vehicle Technologies Office.
