Model of Feedstock and Supply Process Operation of Biomass Steam Plant

January 14, 2011 - A multi-disciplinary team of ORNL researchers – Rekha Pillai, Stuart Daw, Sirisha Nukala, Charles Finney, and Erin Webb - presented results of an FY10 project to model the feedstock supply and process operations of the biomass steam plant currently under construction to the leadership of the Facilities and Operations (F&O) Directorate who supported the project. The team has also received support from F&O for FY11 to further explore alternative feedstocks, biomass moisture and storage.
